Super Wideck®

Long Spanning Architectural Roof and Floor Deck Ceiling Systems

EPIC’s Super Wideck creates expanded, soaring ceiling heights to exemplify modern building trends. The deep structural panels span up to 58’ and can accommodate various hidden utilities. The acoustical option minimizes the reflection of interior noise. Contact EPIC for additional architectural benefits for your next project.

The Charter of the Kansas Chapter of the American Institute of Architects was granted on April 2, 1921. The Chapter has also been known as the Kansas Society of Architects. Throughout our history, AIA Kansas continues to provide our members with these basic benefits:

EDUCATION: Seminars, conferences, and workshops to educate our members of an evolving profession.

www.embracingdisruption2019.com

The theme **Embracing Disruption** has been selected as an acknowledgement of the rapidly transforming environment we are likely to face in upcoming decades, natural and technological, within and outside of the architecture discipline.

ADVOCACY: Providing the profession a voice before legislators and regulators, city and town councils, and within allied organizations.

COMMUNICATION: Promoting the profession and working within our communities to make them better by design.

OUR MISSION: The American Institute of Architects in Kansas, is the voice of the architectural profession and a resource for its members in service to society.

OUR VISION: Driving positive change through the power of design.

Our nearly 700 architect members design and manage projects, select products, contract vendors and guide clients in a variety of industries including commercial, healthcare, residential, hospitality, education and more.

Support your firm’s biggest asset–your employees.

YOU AND YOUR ARCHITECT

Architecture isn’t only for museums, corporations, and the very wealthy. Whether you are remodeling a kitchen, creating your dream home, or planning a commercial building, working with an architect can save time and money while making your new environment more functional, comfortable, and sustainable. The result is a project that is beautiful, original, and distinctive. The challenge lies in knowing how to communicate with your architect in ways that will enable you to get the most from this special collaboration. You and Your Architect can help you to do so—personally, professionally, and creatively.

If you would like a copy of the You and Your Architect Guide send your request to: info@aiaks.org.

QUALIFICATIONS-BASED SELECTION (QBS)

QBS is the well-established procedure for procuring architectural and engineering services for publicly funded projects. It is founded on the principle that taxpayers are best served when a firm’s qualifications, not price, is the first consideration when selecting design professionals. Indeed, studies have found that using the lowest-bidder approach, which fails to consider the impact of quality design and engineering over the lifetime of the project, can end up costing more in time and dollars!

If you would like a copy, send your request to: info@aiaks.org.
THANK YOU TO OUR 2018 SPONSORS!

AIA KANSAS SPONSORSHIP:
Accelerate your business goals, cultivate strategic relationships, increase brand visibility and position your company as an industry leader committed to partnering with architects to create places where we all can thrive.

Sponsorship of AIA Kansas is your opportunity to gain exposure to our members, position your company as a thought leader and trusted source among the design community, to tap into commercial potential and to strategically build relationships in an increasingly competitive business environment.

Contact Jessica at jessica@aiaks.org for current sponsorship opportunities.
JURY CHAIR

ANNE MARIE DUVALL DECKER, FAIA | DUVALL DECKER

Anne Marie Duvall Decker, FAIA, is a founding principal of Duvall Decker Architects, located in Jackson, Mississippi. Duvall Decker is an expanded design practice whose work includes architectural design, community planning, real estate development and facility maintenance. Duvall Decker is recognized for its design and planning excellence and its innovative approach to inner city development. The firm’s work and approach has been highlighted in publications such as the *The New York Times*, *dwell*, *ARCHITECT Magazine*, and *the Journal of Architectural Education*. In 2017, the Architectural League of New York selected Duvall Decker as one of its Emerging Voices.

AIA KANSAS 2018 EXCELLENCE IN ARCHITECTURE

DESIGN AWARDS ANNOUNCED AT THE 2018 DESIGN AWARDS CELEBRATION ON OCTOBER 3RD IN OVERLAND PARK, KS.

ANNE’S JURY ALSO INCLUDED

CODY FARRIS, AIA | DUVALL DECKER

Jackson, MS

Cody Farris, AIA is Senior Associate and Studio Design Leader at Duvall Decker Architects. Cody brings design ability, technical skill, and incredible energy to all projects in the studio and leads some of the firm’s most significant projects. His contributions to design quality are evident in many of the firm’s successful projects, including Bennie G. Thompson Academic and Civil Rights Research Center at Tougaloo College, Alcorn State University’s Dumas Hall, and the Mississippi Department of Information Technology Services Agency Offices and Data Center. Cody received multiple awards for design excellence during his schooling at Louisiana State University where he earned his Bachelor of Architecture. Cody is a registered architect in the state of Mississippi and is a member of the American Institute of Architects.

JEFF GOLDSTEIN, AIA | DIGSAU

Philadelphia, PA

Jeff Goldstein is a Principal and founding partner at DIGSAU. Jeff is passionate about the relationship between people and their physical surroundings, and has shared the firm’s work across the country. He received a Bachelor of Arts in Biology and Environmental Studies from the University of Pennsylvania and a Master of Architecture from Yale University and is currently an Adjunct Professor at Temple University, where he teaches sustainability, technology, and design studios. He guides the firm’s efforts in the design of ecologically-sustainable projects. He serves as a member of the Board of Directors of both AIA Philadelphia and the Community Design Collaborative, where he advocates for design excellence through pro bono preliminary design services to nonprofit organizations.

MARK SANDERSON, AIA | DIGSAU

Philadelphia, PA

Mark Sanderson is a Principal and founding partner at DIGSAU. He received a Bachelor of Architecture from the University of Notre Dame and a Master of Architecture from the University of Pennsylvania. Mark’s extensive project experience positions him as an inhouse expert in architectural technology, project management, and holistic visioning. A relentless problem solver, he has managed complex projects with intricate phasing requirements by developing creative solutions that convert design constraints into opportunities. Mark has experience contributing technical expertise to prefabrication projects and has utilized innovative materials and transfer technologies to increase the efficiency and quality of construction.
Wonderful idea to fundamentally change the use of a historic parking garage and make it viable well into the future. Nicely executed project.

LEAD DESIGNERS
Stan Shelden, AIA  |  Daniel Gensch, AIA

CONTRACTORS / CONSULTANTS
Farha Construction
Integrated Consulting Engineers Inc.
Harwell Engineering
MKEC Engineering, Inc.
Spencer Preservation
The stair and its lounge space landings organize and activate the interior. Laboratory spaces would be good spaces to work with views to the public spaces and access to natural light. Rigorous design that follows its internal dialogue. The envelope is well-developed.
EXCELLENCE IN DESIGN | CITATION HONORABLE MENTION

OLATHE WEST HIGH SCHOOL

Architect: Hollis + Miller Architects | Project Location: Olathe, Kansas | Photographer: Alistair Tutton Photography

Cultivated a sense of an interior “campus green” inside this single high school building; the place everyone gathers and traverses between classes. The varying scale and character of interior spaces are linked in plan and section and create a vibrant educational network. Great thresholds and in-between spaces. Ambitious and successful planning and design for this challenging building type. Sustainability is incorporated as a teaching opportunity.

Bob D. Campbell & Co.
Olsson Associates
Malone, Finkle, Eckhardt & Collins
The design of the skin with its simple, repetitious pattern engages its natural and industrial environment with a sense of wonder. To create such an affect with metal panels is difficult but achieved well here. Clear planning and sectional diagrams informed the project. Convincing accent materials – color and materials. Instead of seeming additive, they help create spaces. The building plan excels at organization and sequence. Great relationship between the trades.
The simple sophistication of this design reveals itself over time. The sustainability agenda and goals are serious and well-integrated into the form of the building. The use of red is playful and fresh but also refined. The building meets both the ground and sky with intention.

LEAD DESIGNER
Matthew Porreca, AIA

DESIGN TEAM
Matthew Porreca, AIA
Rod Kruse, FAIA
Danielle Buttacavoli, AICP AIA
Dana Sorensen, AIA

Dan Brown

CONTRACTORS / CONSULTANTS
Burkett and Wong Engineers – San Diego
Syska Hennessy – San Diego
The plan diagram is clean and clear and contributes to the successful massing of the project. The entry sequence and staircase with adjacent garden is inviting and well executed. The sections beautifully compose natural light and views, promoting a sense of sacred space. Detailing is restrained and simple. Systems are integrated cleanly.

LEAD DESIGNER
Sam de Jong, AIA

DESIGN TEAM
Laura Lesniewski, AIA
Sam de Jong, AIA
Amanda Santoro

CONTRACTORS / CONSULTANTS
Antella Consulting
Bob D. Campbell
SK Design Group
FP&C Consultants
The complex of buildings is responsive to the surrounding context and beautifully connected to the campus landscape. The pin-up spaces would foster engaging project juries and criticism. The dark, simply detailed rails are a complement to the well-proportioned interior spaces. Natural light is well composed throughout the project.
3Ten strives to be your partner. A partner is concerned with all aspects of a project. Every decision should drive you toward your goal. What would I do if this was my building, my money, if I had to live in it? If we ask ourselves those questions, our solutions will be more genuine. With trust, projects run smoother. But trust must be earned. Every day we must work to earn and maintain trust. We must communicate clearly and be upfront and honest when our opinions differ. A good team collaborates and trusts everyone involved to work toward the success of a project. 3-Ten strives to understand why. It is one thing to know the answer, but greater knowledge is gained by the journey.

Those are the 3 main objectives and here are ten ways we accomplish them:

ADAMS ARCHITECTS, LLC

Adams Architects was established in 2015 based on a single concept: integrity. Owners Andrea Albright and Lance Adams firmly believe that the best outcomes are achieved through high-quality design that is developed with honesty and dedication. With nearly 25 years of experience in the architecture and engineering field, Adams Architects has cultivated a breadth of public and private experience that includes industrial, student housing, academic, detention, historic renovation, office, retail and performing arts projects. All of our projects are approached with an eye for performance, buildability and code compliance. We have all witnessed the financial and schedule domino effect that can occur when beautiful design is plagued by mistakes made early in the process. Unlike many firms, our experience isn’t limited to concepts and drawings. Our experience has included real-life application of design, which eliminates the divide between design and construction teams.

AGORA ARCHITECTURAL DESIGN, LLC

When it comes to Architecture – Programming, Designing, Administrating Construction, Virtual Reality, Interior Design, Facilities Management and much more – we can contend with the big firms in our area - Wichita, Kansas City - and around the nation. But, as your local Architect up the street, we feel we have them beat on service.

- On explaining every detail.
- On seamlessly coordinating the construction process.
- On creating and providing documents and systems to help you manage your facility once the project is complete.

We pride ourselves on innovative solutions to meet our clients’ needs and utilize the most effective drawings and images to better communicate those solutions. Agora Architectural Design, LLC has obtained a vast amount of experience in designing a wide variety of project types which include: religious, healthcare, educational, commercial and corporate, municipal and civic, industrial, manufacturing, and retirement facilities.

ALINEA ARCHITECTS, PA

Alinea Architects is a full-service architecture firm offering creative and innovative design to commercial clients. Our services include: Pre-Design, Feasibility Studies, Conceptual Design, Construction Documents (Drawings and Specifications), Post-Design Services including Bidding and Construction Administration, Interior Design, Material Finish Selection, Fixtures and Furnishings Selections, Presentation Renderings, Digital Modeling, Architectural Photography, Code Evaluation, and Permitting Assistance Services for all projects from standard commercial construction to highly specialized industrial and research projects. We have the experience and expertise to handle any project.
**ALLOY ARCHITECTURE**

3500 North Rock Road, Building #500
Wichita, KS  67226
P: 316-634-1111
alloyarchitecture.com

YEAR ESTABLISHED: 1981
Personnel: 23
AIA MEMBER PRINCIPALS: David White, AIA; Bob Faires, AIA; David Riffel, AIA; Jeff Sherrard, AIA; Ben Walter, AIA; Phillip Jordan, AIA; Burke Jones, AIA; Chris Tillison, AIA; Jesse Miller, AIA; Jeff Minar, AIA; Craig Lofton, AIA

Alloy Architecture is an industry leader in commercial, industrial, healthcare, worship and educational design. Our team is committed to providing clients with high-quality architectural design services, in addition to architectural programming, site planning and interior design services. Since 1981, we have prioritized the creation of a client-centered and collaborative environment in order to translate our clients' challenges into opportunities for innovative, yet practical design solutions.

**AMAI ARCHITECTURE**

1510 Walnut Street, Suite #210
Kansas City, MO  64108
P: 816-994-5900 F: 816-994-5901
davea@amaiarchitecture.com
www.amaiarchitecture.com

YEAR ESTABLISHED: 2001
Personnel: 6
AIA MEMBER PRINCIPALS: Tracy Anderson, AIA; Dan Knight, AIA; Nicholas Whitney, AIA

At AMAI Architecture, we strive to combine exceptional client service and compelling design. From the beginning, AMAI has been a practice firmly committed to building strong relationships with our clients based on trust and partnership. Our approach to architecture and its process is simple. Listening and learning from the client is the first step in the process. Before one line can be drawn, it is important to fully comprehend the issues and client goals associated with the project. We develop creative and innovative design concepts that address all issues and respond to the stated budget. Our team is continually curious, diverse and dedicated to interactive design that ultimately exceeds our clients’ goals and produces meaningful architecture. We believe that buildings exist to facilitate human interaction. As architects, it’s our responsibility to design a dynamic experience. Our project success has been predicated upon our creative, cost-effective problem-solving ability.

**ANDERSON KNIGHT ARCHITECTS**

2505 Anderson Avenue, Suite #201
Manhattan, KS  66502
P: 785-539-0806
nick.whitney@anderson-knight.com
www.anderson-knight.com

YEAR ESTABLISHED: 2002
Personnel: 5
AIA MEMBER PRINCIPALS: Tracy Anderson, AIA; Dan Knight, AIA; Nicholas Whitney, AIA

When our clients dream, they ignite a process that allows us to be creative. We use concrete, wood and steel to tell their story and bring their vision to reality. How they feel in a space or how two materials connect are carefully considered, then harmoniously melded with those who live, work and play within. Bringing together materials in a way that makes the complex appear simple is our joy.

AKA is deeply committed to understanding how the nuts and bolts connect the heart and soul. Architecture is only our byproduct of creative design that ultimately tells the story of others. We design buildings, but our desire is to create spaces that cultivate relationships.

**ARCHIMAGES, INC.**

14205 West 95th Street
Lenexa, KS  66215
P: 913-378-9533
kmorrison@archimages-stl.com
www.archimages-stl.com

YEAR ESTABLISHED: 1988
Personnel: 25
AIA MEMBER PRINCIPALS: Kile Morrison, AIA, DBIA

Archimages, Inc. provides architecture and interior design that directly “fits” client needs. We have perfected the art of asking the right questions, listening, and then responding with expert guidance that allows our clientele to transform their vision into reality. Our employees are a tightly knit “family” with an average tenure of 12 years; translation, we provide efficient and responsive design! Our projects continue to win awards for style and sustainability across the numerous markets we serve. Archimages, Inc. - satisfying clients for over 30 years.
Communication is the central measure of every AO project, and great communication starts with listening. Fully understanding the needs of our clients allows us to provide design solutions that inspire. For more than 30 years, our team of Architects, and Designers have developed extensive experience and creativity in a spectrum of project types including commercial, education, medical, religion, industrial, residential, historic, hospitality, and mixed-use. Our diverse and talented team are experienced in building design, interior design, and master-planning. We are qualified to design and manage the complexities of our clients’ large-scale projects and budgets, just as we are in tune with the details and significance of their small and simple projects. We appreciate and respect the civic responsibility we have as Architects and intentionally locate our AO offices in the heart of the downtowns of the communities where we live, work, and play.

Architectural Development Services, LLC was founded in 1999 as a full-service land development and design firm. Over the years the firms’ focus has changed into a full-service architectural design firm whose primary goal is to provide quality architectural services to its clients no matter what the budget size. The firm focus is primarily on commercial projects. The firm has worked on a variety of building types including corporate offices, medical facilities, financial institutions, government organizations, religious facilities, educational facilities, and private residences. ADS is a full service design firm providing programming, master planning, facility space planning, architecture and construction administration.

AIA MEMBER PRINCIPALS:  
Clint Hibbs, AIA, LEED AP

Our firm stands apart from tradition, due to the foresight of BG founders, Stephen Berland and Fred Gibbs, who, over 43 years ago, started a collaborative firm of forward-thinking professionals known for delivering excellent customer service. BG is a mid-sized regional full service A/E design firm known for delivering excellent customer service. We hold four offices; our Manhattan, Kansas, office serves as the corporate headquarters, with other offices in Lawrence, Hutchinson, and Emporia.

Our mission is to provide client-focused service through integrated design solutions. What that means to us is that on every project, we build a collaborative partnership with you where, together, we develop authentic design solutions that resonate with your vision. Our goal is to create design solutions that reflect a balance of technical knowledge and an understanding of human behavior.

www.bnim.com
**YEAR ESTABLISHED:** 1970
**Personnel:** 90 firm-wide, 67 KC

BNIM is an innovative leader in designing high-performance environments. BNIM’s instrumental development of the USGBC, LEED, and the Living Building concept, combined with projects, methods, and research, shaped the direction of the sustainable movement. Through this involvement, the firm has redefined design excellence to elevate human experience together with aesthetics and building performance. In practice, this multifaceted approach to design excellence has yielded national acclaim, including the AIA National Architecture Firm Award, and consistent design recognition nationally and internationally. BNIM is Building Positive, a notion that describes how our practice leverages its collective capacity for design thinking to solve issues at every scale in a way that is focused on building the positive attributes of community and the built environment. Through an integrated process of collaborative discovery, BNIM creates transformative, living designs that lead to vital and healthy organizations and communities.

The basic philosophy of our firm is that we serve in the capacity of facilitators for our clients. In our estimation, the true role of an architect is to take those ideas the client is formulating and mold them into an attractive, useful and functional project that allows the client to better conduct their role and mission in life and in the community being served. As a facilitator, our greatest reward is, and always will be, a satisfied client.

As a regionally focused firm, we have grown in the respect and trust of our clients over the past 36 years. Fully 80%-90% of our projects are performed for repeat clients while many others are performed on a referral basis.

As the world’s population becomes increasingly urbanized, the quality of our cities becomes ever more important. Civic and business leaders across the nation, and around the globe, in communities large and small, recognize this trend and are focusing community attention on “quality of life” and “quality of place.” They recognize that quality of place affects attracting and retaining diverse, talented citizens, sustaining a happy community, and promoting a healthy life.

Buildings and the spaces formed between them – Architecture – are the places where people play out their lives. And the quality of place directly affects how well these lives play out. We are place-makers. We are committed to improving quality of life through the design of meaningful places for human interactions, places that enable, enrich, and inspire human endeavor. We design places of worship, civic institutions, offices for commerce, and urban housing. And we design with the broader community in mind. We design for the citizens.

We believe in the power of design to affect positive change in the use and experience of built environments. We work with clients to discover how they might maximize the use of their facilities to be more effective, and the experience of their environments to be rich and humane.

As a small, focused practice we have the ability to perform “on the ground” research and ethnography. Our ethnographic research provides insight into how a new or renovated facility might improve the work of that group. Through this observation, we often begin to know more about clients than they know about themselves.

We provide a fresh and energetic approach to design, backed by experience that delivers highly functional, durable and sustainable environments. In working this way, we creatively go beyond the typical approach of solving apparent problems to discovering and realizing unforeseen opportunities for our clients.

DMA Architects, PA was launched over 38 years ago by Owner and Principal Donnie D. Marrs with a purpose to build and shape the physical space all people use and enjoy, while at the same time protecting and preserving the beauty and the substance of the surrounding space as a resource for the future. We work with clients to guide them through the decision making process, preliminary and final design, construction drawings, and builder selection and construction administration. Our continued focus is on high quality, private sector projects for government, civic and non-profit organizations.

The strength of the firm is derived from the constant effort to see that the client receives attention from the design professional. The design product and what the firm produces is a reflection of the client’s needs and input. It is sensitivity to our clients that allows our practice in this firm to produce quality design solutions for a wide range of project types.

Falk Architects specializes in solving complex building problems by providing simple but elegant design solutions for our clients. We have a history of providing on-budget, on-time projects. The majority of our work is repeat business from happy clients. Community engagement and pro-bono work also is an important part of our firm. Each year we donate our time to develop at least one project for the good of our communities.

HFG (Health Facilities Group) was established in 1994, with a mission to improve healthcare through architecture.

HFG founder, Stephen Lewallen, saw a need to refocus healthcare architecture on the people who occupy the spaces; from care providers, to patients, to residents. This remains a core philosophy of our firm.

Today, HFG has offices in Wichita, Kansas City, Tulsa, and Omaha. We’ve served more than 100 healthcare institutions, and successfully designed thousands of projects. Our growing staff of planners, architects, and interior designers use their specialized healthcare experience and knowledge to create environments that help to improve the patient and staff experiences.

katie.hoke@hoke-ley.com
www.hoke-ley.com

Hoke Ley is a full-service design studio offering architecture, interior design, and graphic design services to residential, equestrian, commercial and retail clients. Our office strives to provide an enriching experience that draws equally from our craft-focused design approach and midwestern-rooted sensibilities. Our work is guided by the vision of a client, the power of a site, the strength of an idea, and the nuance of detail, and our firm is committed to creating compelling and sensitive spaces of all scales.
HTK Architects has successfully provided clients with comprehensive architectural services since the firm was founded over 60 years ago. With offices in Topeka and Overland Park, our team continues to grow, completing new design, addition and renovation projects throughout the region. We are dedicated to listening to client needs in order to create outstanding design solutions.

HTK Architects has cultivated a breadth of experience designing Civic, Corporate, Healthcare, Higher Education, Judicial, K-12 Education, Military, Religious, and Sports & Recreation facilities. For each project, we focus on creating innovative, sustainable and timeless designs. We do not believe in shortcuts and are dedicated to providing excellent service for each of our clients. As a multi-disciplinary architectural firm, we focus on designing environmentally responsible, functionally appropriate and aesthetically pleasing structures that provide lasting value.

Hollis + Miller Architects is an integrated firm focused on designing inspirational learning environments. We are committed to supporting life-long learning while continually cultivating our reputation for delivering innovative, research-based design solutions as we empower communities to shape their future.

Our Company—The Opus Group® is a family of commercial real estate development, construction and design companies headquartered in Minneapolis, MN with offices and projects around the country. We are built on the rich history and tradition of earlier companies, dating back to 1953. Together, these companies have completed in excess of 2,900 projects totaling more than 290 million square feet.

Opus AE Group’s 61 architects, engineers and interior designers are creative, flexible and innovative. We design buildings that meet our client’s needs and vision by working in collaboration with our clients and our Opus Real Estate Development and Opus Design-Build project managers. We work as an integrated Opus team from the project’s inception to completion to ensure that our client’s get the project they want when they need it.

We share the goal of creating long-term value by aesthetically capturing our client’s organizational culture, maximizing function and utility and enhancing operational efficiency. Our people have the expertise to effectively use state-of-the-art technology and materials to achieve our client’s goals.

As a leader in sustainable design and development, we have designed more than 40 LEED projects, ranging from LEED Certified to LEED Gold.
Plan4 Architecture, formerly Clark Architecture & Design has been serving the central states since 1992. Our design practice focuses on new & Remodel in Commercial Office/Retail, Restaurants, Industrial Water Treatment, Educational/Childcare, and single & Multifamily housing. We are dedicated to providing services for all types and sizes of projects and believe that each project is unique and has special meaning to every client. Plan4 is designing a better tomorrow and building community, through thoughtful design and innovation.

Tevis Architects is a full service architectural firm offering architecture, master planning, interior design, programming and graphic services. Our team brings unique skills, extensive experience, and personal commitment to every one of our projects. Our staff is committed to the success of your project. We believe meeting the design program, while adhering to budget and schedule goals, is the foundation of success. A creative design is not sacrificed at the expense of these goals. Instead, these goals become a catalyst to finding the most successful solution. Our firm’s culture includes a high degree of internal education and research. We continually strive to understand the issues affecting each of our projects and the clients these projects serve. We provide leadership and direction where necessary and work as part of a team that includes our clients, our consultants, and our community. We listen, we investigate, we create, we respond.

THE ARCHITECT
305 North Main
Garden City, KS 67846
P: 620-217-0852
thearchitect@ecn.net

The Architect is versed in almost all areas of practice, contributing practical and efficient, yet creative planning and design services for commercial/office facilities, educational facilities, historic preservation, public work, renovation/restoration, hospitality/healthcare, restaurant/entertainment, retail/recreation, multi/single family residential projects and automotive/dealership facilities. The Architect's approach to design of successful buildings is simple. First and foremost, listen to what the Owner wants and needs, ask questions to clarify specific requirements and actively involve our engineering consultants and construction managers in the design process to achieve the best possible solution for their particular project and to creatively design within the project's program and budget.

Dudley Williams & Associates, PA is a consulting engineering firm established in 1952 for the professional practice of structural engineering for building structures. In its 67 years of existence, DWA has played a key role in the design of projects nationwide from corporate, health care, and educational facilities, to industrial facilities, special event centers and the evaluation and renovation of existing and historic facilities. DWA strives to provide each client with a high quality solution to their structural needs. We value our clients and believe in giving great service. We are open to exploring new ideas to provide creative in providing our clients with appropriate designs with lasting value.
Established in 1919, Foulston Siefkin LLP is the largest and one of the oldest law firms in Kansas. The firm has grown to over 90 lawyers with offices in Wichita, Kansas City, and Topeka. Since our firm is based in Kansas, our clients benefit from a lower cost basis that can lead to a more personal, higher-value delivery of legal services from attorneys recognized by national organizations as among the leading lawyers in the United States.

The firm represents a broad range of clients, including major architectural and engineering firms, construction general and subcontractors, institutional facility owners, agriculture, energy, and natural resource producers and processors, corporations, financial institutions, franchisers and franchisees, health care and senior care providers, insurance companies, manufacturers, professional entities, public utilities, service providers and others.

Our construction law practice includes design and construction contract drafting and consulting, claim negotiation, and dispute resolution in both arbitration and court settings on a nationwide basis. The lead attorney in our construction law practice is AIA Affiliate Member Wyatt Hoch, whose training in architecture and experience in construction place him in a unique position to counsel architects, engineers, and contractors.

Since 1968, Enterprise Precast Concrete has been a leader in the architectural precast industry. We're an American-owned, family-owned company with full architectural precast production manufacturing facilities located in Omaha, Nebraska and Corsicana, Texas. We deliver high-quality precast projects to the Midwest corridor, from top to bottom. Architects and contractors depend on our expertise to produce custom precast concrete panels for nearly every type of vertical construction project. At Enterprise Precast Concrete, no matter the design challenge, our team of structural engineers and technical experts will collaborate to create solutions that meet the aesthetic and structural needs of practically any construction project. While utilizing the latest technologies, we excel in the production of multiple finishes, including form liners, thin brick, thin stone, panel projections, reveal patterns, multiple mix designs, and finishes within the same panel. Enterprise Precast’s early involvement helps to assure that a precast project’s aesthetic goals are met within schedule and budget compliance.

Fond du Lac Stone Inc is an 80-year-old quarry business which fabricates natural full bed depth and thin veneer stone, architectural cut stone, and landscape material such as premium flagstone, outcroppings, wall stone, and steps. Sustainable practices are important to Fond du Lac Stone. Locally harvested stone is a low-maintenance and environmentally friendly construction material that offers strength, durability, and thermal qualities that can improve energy conservation.

We provide high-end, professional architectural photography as well as aerial videos and still shots through our drone service, corporate head shots, and event photography in and around the state of Kansas. Corporate, residential, and commercial spaces, interior and exterior. You dedicate countless hours to create a spectacular venue, we showcase them in vibrant, dramatic images. Our aim is to capture the essence of the building, showing how the architect has expressed themselves through design and the use of materials that allow the building to make a statement.

Established in 1919, Foulston Siefkin LLP is the largest and one of the oldest law firms in Kansas. The firm has grown to over 90 lawyers with offices in Wichita, Kansas City, and Topeka. Since our firm is based in Kansas, our clients benefit from a lower cost basis that can lead to a more personal, higher-value delivery of legal services from attorneys recognized by national organizations as among the leading lawyers in the United States.

The firm represents a broad range of clients, including major architectural and engineering firms, construction general and subcontractors, institutional facility owners, agriculture, energy, and natural resource producers and processors, corporations, financial institutions, franchisers and franchisees, health care and senior care providers, insurance companies, manufacturers, professional entities, public utilities, service providers and others.

Our construction law practice includes design and construction contract drafting and consulting, claim negotiation, and dispute resolution in both arbitration and court settings on a nationwide basis. The lead attorney in our construction law practice is AIA Affiliate Member Wyatt Hoch, whose training in architecture and experience in construction place him in a unique position to counsel architects, engineers, and contractors.
MANKO WINDOWS

800 Hayes Drive
Manhattan, KS  66502
P: 800-642-1488  Local: 913-461-5756
hernst@mankowindows.com
www.mankowindows.com

Mankos Windows is a full window manufacturing facility and a full storefront and curtain wall supplier. We also have full glass fabrication including tempering, beveling, insulated units, custom laminated products, digital ink glass printing, spandrel and glass edge work. We are located in Denver, Des Moines and Manhattan, KS.

HUTTON

2229 South West Street
Wichita, KS  67213
P: 316-942-8855
jherrman@huttonbuilds.com
www.huttonbuilds.com

Hutton has always had a client-centered approach to construction. Since 1992, we have pushed ourselves, the industry and our clients who come to us expecting new ideas, better buildings and leadership they can count on. “Construction” has been in our name since the beginning, but our services have adapted and expanded to meet the demands of our customers for a better project experience.

Today, Hutton employs a team of experts to handle strategic planning, architecture, cost estimating, permitting, construction, and maintenance services – all under one roof. Forget having to coordinate multiple partners. We serve as a single resource for design build projects. If you need a new building or plan to expand, you can rely on Hutton. And with offices in Garden City, McPherson, Salina and Wichita, we can meet you where you are.

HOLMES MURPHY

1828 Walnut Street
Kansas City MO  64108
P: 866-574-6282
nmaletta@holmesmurphy.com
www.holmesmurphy.com

At Holmes Murphy, we pride ourselves on selling “thinking,” not insurance. In a nutshell, we sell the cumulative knowledge and experience that makes insurance and businesses work better. It’s a philosophy that’s worked for us since our inception more than 80 years ago. As an independent brokerage, we serve business and industry leaders across the nation in the areas of property casualty insurance, employee benefits, captive insurance, risk management, and loss control. We know there’s no “one size fits all” solution, which is why we use a comprehensive approach to develop enterprise-wide strategies to support your business plan and culture. We are unique among companies of our size to be balanced between Property Casualty and Employee Benefits. We’re also balanced in market segmentation, helping both large and mid-sized companies. And perhaps most importantly, we’re balanced with growth and profitability. Our only imbalance is our unbridled passion for our customers. Our mission: We make a difference by promoting health, protecting wealth and delivering peace of mind.

MID CONTINENTAL RESTORATION

401 East Hudson Street
Fort Scott, KS  66701
P: 800-835-3700  F: 620-223-5052
matt_deloney@midcontinental.com
john_fagan@midcontinental.com
www.midcontinental.com

Mid-Continental Restoration Co., Inc. is a masonry restoration, historic preservation and general exterior building repair company. MCR is employee-owned and singularly focused on genuine customer satisfaction. We pledge to bring expertise, craftsmanship and the highest safety standards to every project; and integrity, thoroughness and team spirit to every customer relationship. The Mid-Continental experience is professional and reliable, always meeting or exceeding our customers’ expectations. We restore peace of mind that the job will be done right, on time and on budget. We pride ourselves on supplying the most motivated, well-trained and experienced workforce in the industry. MCR has 5 locations to serve you, and we provide services throughout the central United States.

MINICK MATERIALS

326 North Council Road
Oklahoma City, OK  73127
P: 405-834-8280 F: 405-495-1842
tims@minickmaterials.com
www.minickmaterials.com

With more than 300 quality products for commercial and residential applications, we continue to be the leader in our industry. Our selections include soils, sand, CU Structural Soil®, soil enhancing products, building stone, landscape stone, natural thin stone veneer, manufactured stone veneer, Belgard pavers and walls. Whether you are looking for building stone for projects anywhere in the US or landscaping materials for residences across town our professional team provides outstanding service.

MONARCH

8100 Newton Street, Suite #300
Overland Park, KS  66204
P: 913-942-2400
courtney.kounkel@monarch.build
www.monarch.build

MONARCH is a commercial general contractor with a broad base of project experience working with owners, developers, architects, and subcontractors in the Kansas City metro area. They are known for delivering excellent value by forging a deep level of trust with their clients through proactive and honest communication. Partners Eric Turner and Courtney Kounkel, along with their associates, leverage their industry expertise to preserve the integrity of the delivery process, guiding clients as their partner, so that the transformation of their vision into reality becomes an exceptional experience for all. Services include preconstruction estimating and constructability reviews; construction management; general contracting; and post-construction leadership.

MARKETS
We are a full-service contractor whose experience is focused in the corporate, healthcare, retail, non-profit, education, hospitality, and light industrial markets.

NATURAL STONE VENEERS

P.O. Box 347
Fond du Lac, WI  54936
P: 920-923-2800
reeneb@nsvi.com
www.nsvi.com

Natural Stone Veneers International Inc (NSVI) fabricates natural thin veneer stone that can be specified on any project. NSVI offers a level of quality and consistency key to a successful project. From traditional design elegance to contemporary style, natural stone veneer is ideal for commercial and residential projects, interiors and exteriors, hardscapes and water features. Color, texture and durability without the weight…no footings necessary. Explore over 80 natural stone products at: www.nsvi.com.

STEVENS & BRAND

900 Massachusetts Street, Suite #500
Lawrence, KS  66044
P: 785-843-0811
cburger@stevensbrand.com
www.stevensbrand.com

Since 1934, we have been serving the commercial design and construction industry with specialty contracting services. We have been around for over 80 years because we do jobs right the first time. The following are the services we provide throughout the Midwest:

Roof Deck Systems: We offer a variety of roof deck options, including lightweight insulated concrete (LWIC), cementitious wood fiber, and engineered structural composite.

Engineered Fill: We provide cellular concrete engineered fill for a variety of civil and geotechnical applications, including back fills on foundations and retaining walls, soil remediation, void fills, annular pipe fills and slab, and foundation fills.
Since 1934, we have been serving the commercial design and construction industry by providing quality solutions beyond just fireproofing. We felt our name should reflect that. Our name and look may have changed, but you can still expect the same exceptional service when you have WestPro on your team. WestPro Construction Solutions is a specialty subcontractor serving the commercial design and construction industry. During design, our sales people work with architects, engineers, and general contractors, assisting them with design and providing construction budgets. Once construction begins, our experienced production staff and field crews provide first-class service and installation. Experience our service-first business model for yourself and discover why so many of our clients trust us project after project.

</table>
AIA Contract Documents® are a library of over 140 contracts, administrative forms, guides, and exhibits recognized as the benchmark documents for managing transactions and relationships in design and construction projects, and project management and contract administration. The AIA has published Contract Documents for the design and construction industries since 1888. Today, the AIA Contract Documents® are the industry’s most widely accepted standard contract documents and the most fair and balanced to all parties. The documents are drafted and revised by the AIA Contract Documents® Committee with the assistance of legal and insurance counsel and AIA staff. It is important that the current version of each document be used. Consultation with an attorney is recommended with respect to the use and modification of the documents because the legal risks and requirements at issue in design and construction contracts are significant and vary from state to state.

Development of Documents
The AIA Documents Committee is composed of a wide range of thought leaders from across the industry including architects, contractors, lawyers, insurers and others. AIA Contract Documents® are generally accepted by the construction industry as being fair to all parties and they are used as the basis for many project agreements. Drafting and revising the documents is a collaborative effort involving the AIA Documents Committee and other external entities and individuals, including: Institute staff, outside legal counsel, and representatives of insurance companies and other construction industry associations and leaders. In addition to legal liability, the revision process is driven by feedback from those who use the documents in their daily practices as well as the evolution of the design and construction industry.

AIA Contract Documents® are written to provide a common basis for establishing legal and business relationships in the construction process. Because the documents are revised periodically, they reflect industry practice as well as recent court decisions. Changes and developments in the building industry sometimes necessitate drafting new contract documents and revising existing ones. When doing so, the AIA abides by certain Drafting Principles and follows a Revision Policy to ensure that AIA Contract Documents® maintain consistently high standards while still adapting to current trends and practices.

Organization of Documents
AIA Contract Documents® are classified into “series” and “families.” Series divide the documents by type (owner-architect, owner-contractor, architect-consultant, etc.). Families are composed of documents from each series that support a particular method of project delivery (e.g., design-build or construction management). Understanding the document families is necessary to ensure that users select the proper documents and maintain coordination among them.
