Super Wideck®
Long Spanning Architectural Roof and Floor Deck Ceiling Systems

EPIC’s Super Wideck creates exposed, soaring ceiling heights to exemplify modern building trends. The deep structural panels span up to 58” and can accommodate various hidden utilities. The acoustical option minimizes the reflection of interior noise. Contact EPIC for additional architectural benefits for your next project.

The Charter of the Kansas Chapter of the American Institute of Architects was granted on April 2, 1921. The Chapter has also been known as the Kansas Society of Architects. Throughout our history, AIA Kansas has continued to provide our members with these basic benefits:

**EDUCATION:** Seminars, conferences, and workshops to educate our members of an evolving profession.

**MILESTONES**

Oct 27 & 28, 2020
Virtual Meeting

More information coming soon!

https://www.aiaks.org/annual-conference

**ADVOCACY:** Providing the profession a voice before legislators and regulators, city and town councils, and within allied organizations.

**COMMUNICATION:** Promoting the profession and working within our communities to make them better by design.

**OUR MISSION:** The American Institute of Architects in Kansas, is the voice of the architectural profession and a resource for its members in service to society.

**OUR VISION:** Driving positive change through the power of design.

Our nearly 700 architect members design and manage projects, select products, contract vendors and guide clients in a variety of industries including commercial, healthcare, residential, hospitality, education and more.

Support your firm’s biggest asset—your employees.

YOU AND YOUR ARCHITECT

Architecture isn’t only for museums, corporations, and the very wealthy. Whether you are remodeling a kitchen, creating your dream home, or planning a commercial building, working with an architect can save time and money while making your new environment more functional, comfortable, and sustainable. The result is a project that is beautiful, original, and distinctive. The challenge lies in knowing how to communicate with your architect in ways that will enable you to get the most from this special collaboration. *You and Your Architect* can help you to do so—personally, professionally, and creatively.

If you would like a copy of the *You and Your Architect Guide*, send your request to: info@aiaks.org.

QUALIFICATIONS-BASED SELECTION (QBS)

QBS allows for public and private organizations and entities to select and use the architectural and engineering services that best serve them and the public. It bases the selection upon free and open competition that is focused on the design professionals’ qualifications, experience, skills, personnel, and price. This frees the selecting organization or entity to address value in terms of quality, efficiency and other long term considerations that may not be accounted for under the limited determinative factor of initial price alone. Allow us to help you manage this process.

For more information, visit us on our website at: https://www.aiaks.org/procurement-qbs
THANK YOU TO OUR 2019 SPONSORS!

AIA KANSAS SPONSORSHIP:
Accelerate your business goals, cultivate strategic relationships, increase brand visibility and position your company as an industry leader committed to partnering with architects to create places where we all can thrive.

Sponsorship of AIA Kansas is your opportunity to gain exposure to our members, position your company as a thought leader and trusted source among the design community, to tap into commercial potential and to strategically build relationships in an increasingly competitive business environment.

Contact Rachel at rachel@aiaks.org for current sponsorship opportunities.
2019 EXCELLENCE IN DESIGN AWARDS

JURY CHAIR

Jason Smith, AIA, LEED AP BD+C | KieranTimberlake, Partner | Philadelphia, PA

Jason Smith is a partner at KieranTimberlake, an award-winning architecture firm recognized for its environmental ethos, research expertise, and innovative design. In over twenty years at KieranTimberlake, Jason has led the design and construction of the firm’s pivotal projects and has fostered the firm’s research and design culture. Jason works at all scales from private homes to large-scale master plans and has completed projects across North America.

He is currently working on projects in Toronto, San Francisco, and Santa Barbara. He recently completed the Engineering Research Center at Brown University and the San Joaquin Dining Commons at the University of California Santa Barbara.

Jason is a passionate advocate for an ethic and an aesthetic of environmental responsibility in architecture. His projects have been published in Architect, Architectural Record, and Faith and Form, and have been awarded internationally.

AIA KANSAS 2019 EXCELLENCE IN ARCHITECTURE

DESIGN AWARDS WERE ANNOUNCED AT THE 2019 AWARDS CELEBRATION ON SEPTEMBER 12th IN WICHITA, KS.

JASON’S JURY ALSO INCLUDED

RACHEL S. SCHADE, AIA | Assistant Teaching Professor, Associate Director for Student Placement, Department of Architecture, Design & Urbanism

Rachel Schade, AIA is a full-time Associate Teaching Professor and Associate Director for Student Placement in the B. Arch. program at Drexel University. Continuing to consult on architectural projects, Ms. Schade was a founding principal of Schade and Bolender Architects, a woman-owned business with a diverse array of residential, institutional and civic projects. Rachel is the author of the Philadelphia Rowhouse Manual, and remains active in community affairs.

MARK SANDERSON, AIA | DIGSAU

PHILADELPHIA, PA

Mark Sanderson is a principal and founding partner at DIGSAU. He received a Bachelor of Architecture from the University of Notre Dame and a Master of Architecture from the University of Pennsylvania. Mark’s extensive project experience positions him as an in-house expert in architectural technology, project management, and holistic visioning.
Lively and varied interventions into the original shell. It captures a nice dialog between new and old, allowing the roof structure to exert a presence. The insertions are clean, do not create too much noise, and create a purposeful counter position to the original fabric.
Effective juxtaposition of new, ungrounded form with the original pavilion. The proportional module is carried forward in a very effective way and the crisply detailed execution honors Miesian legacy.
Bright and light interiors with judicious use of materials. Clever iconography and strong connectivity with the exterior from community spaces. The furnishings coordinate nicely with restrained interiors. It looks like a terrific place to work.

Very high achievement across the awards criteria with great evidence of a completed project. Exterior and interior detailing are interconnected. The design execution is synchronous with program development and the project raises the bar for design quality in an affordable college context. This building would be welcome on any campus.

Highest achievement in sustainable design criteria with a comprehensive approach resulting in an integrated building form. The project takes a renewed look at a tired and often banal typology and creates a dignified workplace. Detailing is refined with simple and effective formal moves.
Overall, a very complete and compelling presentation. The jury enjoyed the transformation of the original house. The project updated a beautiful spec house to fit a contemporary lifestyle with a killer front door. Understatement is consistent with the character of the neighborhood.
The louvers cleverly use borrowed light while also maintaining privacy. Warm tones provide a nice sense of materiality. The project made a destination out of an unused, leftover space that students will now seek out.

3-Ten strives to be your partner. A partner is concerned with all aspects of a project. Every decision should drive you toward your goal. What would I do if this was my building, my money, if I had to live in it? If we ask ourselves those questions, our solutions will be more genuine. With trust, projects run smoother. But trust must be earned. Every day we must work to earn and maintain trust. We must communicate clearly and be upfront and honest when our opinions differ. A good team collaborates and trusts everyone involved to work toward the success of a project. 3-Ten strives to understand why. It is one thing to know the answer, but greater knowledge is gained by the journey. Those are the 3 main objectives and here are ten ways we accomplish them: 1. Communicate. 2. Understand the motivation. 3. Honesty. 4. Community involvement. 5. Follow through. 6. Engagement. 7. Flexibility. 8. Ownership. 9. Help others succeed. 10. Enjoy what you do.

ADAMS ARCHITECTS

Adams Architects was established in 2015 based on a single concept: integrity. Owners Andrea Albright and Lance Adams firmly believe that the best outcomes are achieved through high-quality design that is developed with honesty and dedication. With more than 25 years of experience in the architecture and engineering field, Adams Architects has cultivated a breadth of public and private experience that includes industrial, student housing, academic, detention, historic renovation, office, retail and performing arts projects. All of our projects are approached with an eye for performance, buildability and code compliance. We have all witnessed the financial and schedule domino effect that can occur when beautiful design is plagued by mistakes made early in the process. Unlike many firms, our experience isn’t limited to concepts and drawings. Our experience has included real-life application of design, which eliminates the divide between design and construction teams.

AGORA ARCHITECTURAL DESIGN, LLC

When it comes to Architecture - Programming, Designing, Drawing, Construction Administration, Virtual Reality, Interior Design, and much more - we can contend with the big firms in our area - Wichita, Kansas City - and around the nation. But, as your local Architect up the street, we feel we have them beat on service. • On explaining every detail • On seamlessly coordinating the construction process • On creating and providing documents and systems to help you manage your facility once the project is complete. We pride ourselves on innovative solutions to meet our client’s needs and utilize the most effective drawings and images to better communicate those solutions. Agora Architectural Design, LLC has obtained a vast amount of experience in designing a wide variety of project types which include: religious, healthcare, educational, commercial and corporate, municipal and civic, industrial, manufacturing, and retirement facilities.

ALINEA ARCHITECTURE

Alinea Architects is a full-service architectural firm serving all commercial clientele; specializing in Corporate, Educational, Industrial, Research, and Retail projects. Services we provide: Pre-Design evaluations, Feasibility Studies, Conceptual Designs, Construction Document Services including project design drawings and specifications, Post-Design Services including Bidding / Construction Administration, Interior Design, including material finishes and selection of fixtures and furnishings, Presentation Renderings / Digital Modeling, Code Evaluation, and Permitting Assistance Services for all projects from standard commercial construction through highly specialized industrial projects.
Alloy Architecture is an industry leader in commercial, industrial, healthcare, worship and educational design. Our team is committed to providing clients with high-quality architectural design services, in addition to architectural programming, site planning and interior design services. Since 1981, we have prioritized the creation of a client-centered and collaborative environment in order to translate our clients’ challenges into opportunities for innovative, yet practical design solutions. “Architecture creates opportunities to enhance the human experience. We focus on forging unique, purposeful and lasting environments by blending design elements, technology and construction into a final project stronger than its individual parts. But most importantly, Alloy Architecture fuses an unmatched ability to listen to clients with design skills that translate goals into reality.”

At AMAI Architecture, we strive to combine exceptional client service and compelling design. From the beginning, AMAI has been a practice firmly committed to building strong relationships with our clients based on trust and partnership. Our approach to architecture and its process is simple. Listening and learning from the client is the first step in the process. Before one line can be drawn, it is important to fully comprehend the issues and client goals associated with the project. We develop creative and innovative design concepts that address all issues and respond to the stated budget. Our team is continually curious, diverse and dedicated to interactive design that ultimately exceeds our clients’ goals and produces meaningful architecture. We believe that buildings exist to facilitate human interaction. As architects, it’s our responsibility to design a dynamic experience. Our project success has been predicated upon our creative, cost-effective problem-solving ability.

When our clients dream, they ignite a process that allows us to be creative. We use concrete, wood and steel to tell their story and bring their vision to reality. How they feel in a space or how two materials connect are carefully considered, then harmoniously melded with those who live, work and play within. Bringing together materials in a way that makes the complex appear simple is our joy. AKA is deeply committed to understanding how the nuts and bolts connect the heart and soul. Architecture is only our byproduct of creative design that ultimately tells the story of others. We design buildings, but our desire is to create spaces that cultivate relationships.

Archifootprint is a unique architectural firm, staffed with the most experienced professionals in the field of sustainable design. Focused on energy, industrial energy buildings, efficient design and on driving change for our current built environment, we are no run-of-the-mill cookie. Our mission statement places us as a driving force for change. Starting from an attitude of service, to demystify the great complexities of architecture and provide clear, tangible designs, spaces and documents for buildings which are realistic, safe, pleasant and mindful of the footprint they leave behind, in the lives and the environment of those around them.
Archimages, Inc. provides architecture and interior design that directly “fits” client needs. We have perfected the art of asking the right questions, listening, and then responding with expert guidance that allows our clientele to transform their vision into reality. Our employees are a tightly knit “family” with an average tenure of 12 years; translation, we provide efficient and responsive design! Our projects continue to win awards for style and sustainability across the numerous markets we serve. Archimages, Inc. - satisfying clients for over 30 years.

Architect One is a full-service Architecture, Planning and Interior Design firm founded in 1988. Our dedicated team brings a multitude of diverse experiences, but collectively we bring the same fundamental approach to every project: LISTEN . DESIGN . INSPIRE

The ability to truly listen to each client’s unique story and fully understand their challenges allows our team at Architect One to find creative and innovative solutions that bring their vision to life.

For over 31 years, we have been proud to design innovative, efficient, state of the art facilities for a diverse portfolio of clients. As your strategic partner, we are dedicated to the success of your project and aim to inspire the communities you serve with the results of our work.

Architectural Development Services, LLC was founded in 1999 as a full-service land development and design firm. Over the years the firms’ focus has changed into a full-service architectural design firm whose primary goal is to provide quality architectural services to its clients no matter what the budget size. The firm focus is primarily on commercial projects. The firm has worked on a variety of building types including corporate offices, medical facilities, financial institutions, government organizations, religious facilities, educational facilities, and private residences. ADS is a full service design firm providing programming, master planning, facility space planning, architecture and construction administration.

BBN Architects believes in crafting works of architecture and landscape architecture that are sensitive to their context and appropriate to their place.

We are committed to the thoughtful integration of our buildings and landscapes into the natural environment through the use of regional materials, and sustainable design strategies.

We respect the unique combination of culture and environment that surrounds each project and endeavor to deliver projects that artfully respond to their function.

BNIM is a collaboration of architectural, design, and planning professionals who leverage a collective capacity for design thinking to solve local and global issues related to design and community. We offer competitive salaries and benefits, an energetic workplace, ongoing training opportunities, and an environment that allows employee interests and strengths to flourish. BNIM’s commitment to design excellence, which combines human experience with aesthetics and building performance, has yielded national acclaim, including the AIA National Architecture Firm Award and top rankings on the ARCHITECT 50 list, as well as consistent design recognition nationally and internationally.
BRR ARCHITECTURE

The basic philosophy of our firm is that we serve in the capacity of facilitators for our clients. In our estimation, the true role of an architect is to take those ideas the client is formulating and mold them into an attractive, useful and functional project that allows the client to better conduct their role and mission in life and in the community being served. As a facilitator, our greatest reward is, and always will be, a satisfied client.

As a regionally focused firm, we have grown in the respect and trust of our clients over the past 37 years. Fully 80%-90% of our projects are performed for repeat clients while many others are performed on a referral basis.

As the world’s population becomes increasingly urbanized, the quality of our cities becomes ever more important. Civic and business leaders across the nation, and around the globe, in communities large and small, recognize this trend and are focusing community attention on “quality of life” and “quality of place.” They recognize that quality of place affects attracting and retaining diverse, talented citizens, sustaining a happy community, and promoting a healthy life.

Buildings and the spaces formed between them -- Architecture -- are the places where people play out their lives. And the quality of place directly affects how well these lives play out. We are place-makers. We are committed to improving quality of life through the design of meaningful places for human interactions, places that enable, enrich, and inspire human endeavor. We design places of worship, civic institutions, offices for commerce, and urban housing. And we design with the broader community in mind. We design for the citizens.

**DLR Group**

DLR Group is an integrated design firm delivering architecture, engineering, planning, and interiors from 30 global locations. The Kansas City office employs 90 design professionals with expertise in Civic, Courts, Detention, Energy Services, Higher Education, Hospitality, K-12 Education, Performing Arts, and Sports design. DLR Group designs includes the Missouri Innovation Campus, Salina Cental and Salina South High School modernizations, and the Hilton Hotel at the Iowa Events Center. Nationally the firm is preserving the iconic post-modern Portland Building, is leading the renaissance of mass timber design and construction, and designed the Los Angeles Memorial Coliseum modernization. Our promise is to elevate the human experience through design. This promise inspires sustainable design for a diverse group of public and private sector clients, local communities, and our planet.

**DMA Architects, PA**

DMA Architects, PA was launched over 38 years ago by Owner and Principal Donnie D. Marrs with a purpose to build and shape the physical space all people use and enjoy, while at the same time protecting and preserving the beauty and the substance of the surrounding space as a resource for the future. We work with clients to guide them through the decision making process, preliminary and final design, construction drawings, and builder selection and construction administration. Our continued focus is on high quality, private sector projects for government, civic and non-profit organizations. The strength of the firm is derived from the constant effort to see that the client receives attention from the design professional. The design product and what the firm produces is a reflection of the client's needs and input. It is sensitivity to our clients that allows our practice in this firm to produce quality design solutions for a wide range of project types.

**Emig and Hauff Associates Architects**

We are a small firm in a small town designed to serve small and large clients alike. We have experience serving many state agencies as well as many local schools, businesses and homeowners.

**Falk Architects**

Falk Architects specializes in solving complex building problems by providing simple but elegant design solutions for our clients. We have a history of providing on-budget, on-time projects. The majority of our work is repeat business from happy clients. Community engagement and pro-bono work also is an important part of our firm. Each year we donate our time to develop at least one project for the good of our communities.

At Gould Evans, we see partnership as the expression of individual talents made manifest through a shared vision. We seek partners who share our values of intellectual curiosity, collaboration and passion for meaningful outcomes.
Our portfolio is intentionally diverse; in project type, scale and location to encourage innovative, critical thinking and discourage a formulaic approach. Above all, we work to create solutions that transform their surroundings, engage their occupants, sustain their environment and support our clients’ missions.
Currently, we have more than 150 associates across our Kansas City, Lawrence, Phoenix, San Francisco, and New Orleans studios.
GRAVITY::WORKS ARCHITECTURE

Established in 1952, Gravity::Works is one of Kansas’ most respected architectural firms. Our extensive experience and knowledge through innovating design solutions has allowed us to cultivate a deliberately diverse portfolio. Project types include K-12 and higher education, industrial, financial, recreational, retirement living, adaptive reuse, renovations, multi-family housing, historic preservation and adaptive reuse.

Always advocating for client involvement in the early phases of design, Gravity::Works provides design services from master planning through ribbon cutting employing evidence-based processes that lead to the truest, most studied expressions of a project. Our firm principals facilitate innovation and discovery, walking with our clients through the duration of the project timeline. We promise a trusting, client-centric environment and will consistently prove to be good stewards for the projects.

Defying gravity since 1952.

Our goal is client focused professional design.

Serving southeast Kansas for over 30 years, Heckman & Associates, P.A strives to be a client-oriented architectural firm that works closely with the owner to design and build environments that satisfy their physical requirements, are energy efficient, aesthetically appropriate and are sensitive to the project budget. When all of this is accomplished the lives of the building users are enriched.

HFG ARCHITECTURE (HEALTH FACILITIES GROUP, LLC)

HFG (Health Facilities Group) was established in 1994, with a mission to improve healthcare through architecture. HFG founder, Stephen Lewallen, saw a need to refocus healthcare architecture on the people who occupy the spaces; from care providers, to patients, to residents. This remains a core philosophy of our firm.

Today, HFG has offices in Wichita, Kansas City, Tulsa, and Omaha. We’ve served more than 100 healthcare institutions, and successfully designed thousands of projects. Our growing staff of planners, architects, and interior designers use their specialized healthcare experience and knowledge to create environments that help to improve the patient and staff experiences.

Hollis + Miller is an integrated design firm 100% committed to education and designing the future of learning environments. For 70 years, our integrated studios of architects, structural engineers, and graphic and interior designers have harnessed the power of co-creation to develop research-based designs supporting learners of all ages. Our Kansas City and Castle Rock studios provide innovative solutions for K-12 and higher education clients while engaging and empowering the communities we serve.
HTK Architects has successfully provided clients with comprehensive architectural services since the firm was founded over 60 years ago. With offices in Topeka and Overland Park, our team continues to grow, completing new design, addition and renovation projects throughout the region. We are dedicated to listening to client needs in order to create outstanding design solutions.

HTK Architects has cultivated a breadth of experience designing Civic, Corporate, Healthcare, Higher Education, Judicial, K-12 Education, Military, Religious, and Sports & Recreation facilities. For each project, we focus on creating innovative, sustainable and timeless designs. We do not believe in shortcuts and are dedicated to providing excellent service for each of our clients. As a multi-disciplinary architectural firm, we focus on designing environmentally responsible, functionally appropriate and aesthetically pleasing structures that provide lasting value.

Krehbiel Architecture is a multi-discipline design organization in Wichita, Kansas made up of highly trained architects.

Krehbiel Architecture has an impressive and diverse architectural portfolio built around creativity, innovation, imagination, open communication, technology, integrity and personal service.

L.B. Manske Architecture & Design, Inc. was founded on the principle of providing service to the client. Period. We will work with you, whatever the location, no matter the time of day, and whatever your deadlines require. We understand that your business does not grow between concept and opening day, and we focus on quality of design, speed to market, and commitment to your budget. Together with a national network of engineering consultants, we provide services to our clients across the country, wherever their business takes them.

LK Architecture is a full-service A/E firm actively working on a multitude of projects coast to coast. Over the last 50 years, our firm has grown into a national practice with a diverse portfolio of work including healthcare, hospitality, office, mixed-use, institutional and industrial projects. In addition to traditional architectural services, we offer electrical, mechanical and plumbing engineering, interior design, land planning and landscape architecture solutions in-house. This ensures that various aspects of our clients’ projects, from start to finish, are managed by one coherent team.

Brian M. McDaniel, AIA Founder - Principal

Founded in early 2011 and utilizing over 20 years of experience in public, private, commercial and residential architecture, MOD can help you achieve your goals. Whether you are renovating, adding on, building new or adaptively-reusing, MOD approaches each commission as an opportunity to find the best solution for the given situation. MOD seeks to deliver value through exceptional service in the realization of our clients’ projects. The investment of trust, time, energy and money should create a process that yields nothing less than great results.

NOLTE & ASSOCIATES, PA

9400 Reeds Road, Suite #200
Overland Park, KS 66207
P: 913-322-2444
tnolte@noltearch.com

YEAR ESTABLISHED: 1982

AIA KANSAS MEMBER PRINCIPALS:
Thomas R. Nolte, AIA - Principal

It is the philosophy, professional commitment & desire of Nolte & Associates to develop feasible solutions for clients that meet the functions, the aesthetics & are innovative, yet within the appropriate parameters desired.

Nolte & Associates value providing attentive service, excellence in design, awareness of time and budget constraints & professional integrity. The firm principals are involved in each project & engages with the client to ensure that the project is inclusive of their needs.

Each project presents a unique set of programming, design & code requirements. Nolte & Associates has developed procedures in each phase of a project that help ensure the quality & consistency of our services that assists in creating successful projects. Interaction with the project team allows the Owner to make informed decisions that are meaningful to the overall success of the project.
NSPJ Architects is a full-service, award-winning architecture, landscape architecture, and land planning design firm. Since the firm’s inception in 1961, NSPJ has built a long standing tradition of excellence in service and design, with the utmost commitment to quality. We have provided comprehensive design services for more than 6,500 projects encompassing a diverse range of types and complexities. Our design professionals provide clients with distinct solutions for projects ranging from new builds to historic renovations. At NSPJ, we embrace timeless design; from the most detailed, classical styles to the refined simplicity of contemporary architecture. Our goal is to reflect our client’s needs and personality, while still enabling the project to remain on time and in budget during the construction process.

Our Company—The Opus Group® is a family of commercial real estate development, construction and design companies headquartered in Minneapolis, MN with offices and projects around the country. We are built on the rich history and tradition of earlier companies, dating back to 1953. Together, these companies have completed in excess of 2,900 projects totaling more than 290 million square feet.

Opus AE Group’s 61 architects, engineers and interior designers are creative, flexible and innovative. We design buildings that meet our clients’ needs and vision by working in collaboration with our clients and our Opus Real Estate Development and Opus Design-Build project managers. We work as an integrated Opus team from the project’s inception to completion to ensure that our clients get the project they want when they need it. We share the goal of creating long-term value by aesthetically capturing our clients’ organizational culture, maximizing function and utility and enhancing operational efficiency. Our people have the expertise to effectively use state-of-the-art technology and materials to achieve our clients’ goals.

As a leader in sustainable design and development, we have designed more than 40 LEED projects, ranging from LEED Certified to LEED Gold.

For 50 years, PGAV has committed to fulfilling our clients’ vision through creative and technical innovation. We have developed a studio environment where traditional disciplines of master planning, architecture, exhibit design, interior design, graphics, theming, landscape architecture and industrial design are merged to create powerfully experiential environments. We are an enterprise founded on client service, and fueled by the challenge of turning life’s great experiences into successful environments.

In our many years of design and service work, we have learned how to draw from our successes and plan for the future by treating each client as an individual and not a project type. We approach each design challenge with the purpose of creating a solution that embodies the client’s needs, style and workflow, while ultimately reflecting their unique philosophy and identity in the character of the finished space.

Plan4 Architecture has been serving the central states for 30 years. Our design practice focuses on New & Remodel in Commercial Office/Retail, Restaurants, Industrial/Water Treatment, Educational, Childcare and Single and Multifamily Residential. We are dedicated to provide services for all types and sizes of projects. We believe that each project, large or small, should reflect the unique character of the client and site. Plan4 is designing for a better tomorrow and building community through thoughtful design and innovation.
PRAIRIE WORKS DESIGNS INC.

1678 Cheyenne Road
Moundridge, KS 67107
P: 620-345-8332
www.pwdstudios.com

Pulse Design Group is a full-service architectural design firm with 40+ years of experience in healthcare architecture and a true passion for the healthcare community.
Specializing in architecture, interior design, medical equipment planning and virtual reality, we work to develop long-term professional relationships with our clients and are capable of guiding them through every aspect of a project. This forward-thinking approach has positioned our firm for growth as one of the few architectural firms in the Kansas City region solely focused on the healthcare industry.
Pulse Design Group has the capacity to work on the most challenging and complex healthcare projects. From in-depth participatory planning to extensive on-site work with project partners, our time-tested process allows us to understand each client’s philosophy and environment. As a result, we are able to develop design concepts that maximize efficiency while responding to current market demands.

SPANGENBERG PHILLIPS TICE ARCHITECTURE
121 North Mead, Suite #201
Wichita, KS 67202
P: 316-267-4002
www.sptarchitecture.com

YEAR ESTABLISHED: 1985
AIA KANSAS MEMBER PRINCIPALS:
Randy Phillips, AIA - Partner; Greg Tice, AIA - Partner; Brad Teeter, AIA - Partner

Established in 1985, Spangenberg Phillips Tice Architecture is a full-service architecture, interior architecture and landscape design firm. Our extensive experience includes civic, corporate office, education, entertainment, financial, healthcare, hospitality, multi-family residential, real estate development, recreation, religious, retail, senior living and custom single-family residential projects. Spangenberg Phillips Tice Architecture is mid-sized by design, facilitating cost-effective design services without sacrificing creativity, aesthetic appeal or innovation. Our services are customized to each client’s unique design program and facility needs to ensure successful project completion and total client satisfaction.
Established in 1935, Stark Wilson Duncan Architects Inc (SWD) is a full-service, client focused architectural firm with offices in the historic Country Club Plaza in Kansas City, Missouri. SWD has experience in a wide range of projects, with an emphasis on historic preservation / rehabilitation, as well as multi-family housing, senior living, office, master planning, health care and restaurant design. In 2020, SWD is celebrating its 85th anniversary. Since 1999, principals Paul Stark and Tim Wilson have led the design efforts of SWD, and in that time have successfully completed over 100 significant historic projects, as well as numerous other existing and new construction projects. SWD’s thoughtful vision for rehabilitation of neglected buildings and new construction has played a major role in creating new in-city neighborhoods and revitalizing deteriorated urban areas.

STUDIO Q, LLC was established in 2014 with the purpose of positively impacting others through design.

Studio Q, LLC was established in 2014 with the purpose of positively impacting others through design.

Studium offers architect-led design build services to provide our clients quality design and building value within their budget. Partners Anthony Jacobs, Chad Jimenez, and Wes Morgan enjoy working with creative clients who appreciate hand-crafted details to give their built environments character and personality. Because we are a true architect-led design-build firm, we prioritize design with constructibility and budget in mind. We do not specialize in any single project type, and welcome design challenges. We are proud to have worked with many of Kansas's most exciting new breweries, including Central Standard Brewing, Hopping Gnome Brewing, Aero Plains Brewing, Dodge City Brewing, and Wichita's newest brewpub, Nortons Brewing, which features a 7,000 sf beer garden.
**TEVIS ARCHITECTS**

10820 Shawnee Mission Parkway, Suite #201
Shawnee, KS 66203
P: 913-599-3003
ttevis@tevisarchitects.com

**YEAR ESTABLISHED:** 1993

**AIA KANSAS MEMBER PRINCIPALS:**
Terry Tevis, AIA, NCARB, Principal

Tevis Architects is a full service architectural firm offering architecture, master planning, interior design, programming and graphic services. Our team brings unique skills, extensive experience, and personal commitment to every one of our projects. Our staff is committed to the success of your project. We believe meeting the design program, while adhering to budget and schedule goals, is the foundation of success. A creative design is not sacrificed at the expense of these goals. Instead, these goals become a catalyst to finding the most successful solution. Our firm’s culture includes a high degree of internal education and research. We continually strive to understand the issues affecting each of our projects and the clients these projects serve. We provide leadership and direction where necessary and work as part of a team that includes our clients, our consultants, and our community. We listen, we investigate, we create, we respond.

**THE ARCHITECT**

305 North Main
Garden City, KS 67846
P: 620-217-0852
thearchitect@gcnet.com

**YEAR ESTABLISHED:** 1998
Personnel: 2.5

**AIA KANSAS MEMBER PRINCIPALS:**
Bruce Glass, AIA

The Architect is versed in almost all areas of practice, contributing practical and efficient, yet creative planning and design services for commercial/office facilities, educational facilities, historic preservation, public work, renovation/restoration, hospitality/healthcare, restaurant/entertainment, retail/recreation, multi/single family residential projects and automotive/dealership facilities. The Architect's approach to design of successful buildings is simple. First and foremost, listen to what the Owner wants and needs, ask questions to clarify specific requirements and actively involve our engineering consultants and construction managers in the design process to achieve the best possible solution for their particular project and to creatively design within the project's program and budget.

**TIM CLARK ARCHITECTURE**

22230 Lower McDowell Road

Paul C. Minto, AIA - President
Ryan D. Hunter, AIA

This is a small firm that does amazing work. They get it, they listen and their designs are stellar. Their clients are their greatest collaborators. Almost all their work comes from referrals. Many of the referrals are from Contractors. That’s a refreshing bit of difference for the profession.

Their collaborative process is your resource. It combines incredible creativity with practical know-how, youthful energy and decades of professional practice. The results are wonderful architecture and lasting relationships.

The majority of their work centers on the needs of moderate sized businesses and the entrepreneurs that guide them. They like learning each client’s story. That has led to a number of wonderful residential projects as well.

Urban Prairie Architectural Collaborative, P.C. appreciates your curiosity. Talk with them. They love what they get to do and are always happy to share their perspective! Thanks.

www.dwise.com

YEAR ESTABLISHED: 1952
FIRM TYPE: Structural Engineer/Engineering Services

DUDLEY WILLIAMS & ASSOCIATES, PA is a consulting engineering firm established in 1952 for the professional practice of structural engineering for building structures. In its 68 years of existence, DWA has played a key role in the design of projects nationwide from corporate, health care, and educational facilities, to industrial facilities, special event centers and the evaluation and renovation of existing and historic facilities.

DWA strives to provide each client with a high quality solution to their structural needs. We value our clients and believe in giving great service. We are open to exploring new ideas to provide creative in providing our clients with appropriate designs with lasting value.
Since 1968, Enterprise Precast Concrete has been a leader in the architectural precast industry. We’re an American-owned, family-owned company with full architectural precast production manufacturing facilities located in Omaha, Nebraska and Corsicana, Texas. We deliver high-quality precast projects to the Midwest corridor, from top to bottom. Architects and contractors depend on our expertise to produce custom precast concrete panels for nearly every type of vertical construction project. At Enterprise Precast Concrete, no matter the design challenge, our team of structural engineers and technical experts will collaborate to create solutions that meet the aesthetic and structural needs of practically any construction project. While utilizing the latest technologies, we excel in the production of multiple finishes including form liners, thin brick, thin set stone, panel projections, reveal patterns, multiple mix designs and finishes within the same panel. Enterprise Precast’s early involvement helps to assure that a precast project’s aesthetic goals are met within schedule and budget compliance.

At Holmes Murphy, we pride ourselves on selling “thinking,” not insurance. In a nutshell, we sell the cumulative knowledge and experience that makes insurance and businesses work better. It’s a philosophy that’s worked for us since our inception more than 80 years ago. As an independent brokerage, we serve business and industry leaders across the nation in the areas of property casualty insurance, employee benefits, captive insurance, risk management, and loss control. We know there’s no “one size fits all” solution, which is why we use a comprehensive approach to develop enterprise-wide strategies to support your business plan and culture. We are unique among companies of our size to be balanced between Property Casualty and Employee Benefits. We’re also balanced in market segmentation, helping both large and mid-sized companies. And perhaps most importantly, we’re balanced with growth and profitability. Our only imbalance is our unbridled passion for our customers. Our mission: We make a difference by promoting health, protecting wealth and delivering peace of mind.

Manko Windows is a full window manufacturing facility and a full storefront and curtain wall supplier. We also have full glass fabrication including tempering, beveling, insulated units, custom laminated products, digital ink glass printing, spandrel and glass edge work. We are located in Denver, Des Moines and Manhattan, KS.

With more than 300 quality products for commercial and residential applications, we continue to be the leader in our industry. Our selections include soils, sand, CU Structural Soil®, soil enhancing products, building stone, landscape stone, natural thin stone veneer, manufactured stone veneer, Belgard pavers and walls. Whether you are looking for building stone for projects anywhere in the US or landscaping materials for residences across town our professional team provides outstanding service.
The bricks and mortar of the construction profession are the byproducts of Monarch’s collective passion, which is an intense dedication to our project partners’ success. Clients engage us to build new facilities to accommodate growth, renovate and expand existing spaces, and to help improve building efficiencies. Authentic and transparent communication is at the foundation of everything we do, including preconstruction estimating and constructability reviews, construction management, general contracting, and post-construction services. With a focus in the office, healthcare, retail, non-profit, service, and industrial markets, we draw on industry expertise to convert our clients’ visions into realities.

Based in Lawrence, KS, PROSOCO is a national manufacturer of products for stabilizing masonry walls; cleaning, protecting and maintaining concrete; making building envelopes air- and water-tight; and cleaning, protecting and restoring new and existing masonry buildings. We strive to provide innovative products and services that improve the appearance and performance of our built environment. Since our founding in 1939, we’ve fostered a reputation across the nation and internationally as a company that goes above and beyond for our customers in every way possible. prosoco.com | 800 255 4255. You. Us. The project.

Sky Factory is the only designer of evidence-based, virtual skylights. Our family of Luminous SkyCeilings and Windows, plus our Digital Cinema product line are biophilic design applications that provide research-verified, architectural solutions for a range of healthcare, commercial and specialty spaces.

Since 1934, we have been serving the commercial design and construction industry with specialty contracting services. We have been around for over 80 years because we do jobs right the first time. The following are the services we provide throughout the Midwest:

- Roof Deck Systems: We offer a variety of roof deck options, including lightweight insulated concrete (LWIC), cementitious wood fiber, and engineered structural composite.
- Engineered Fill: We provide cellular concrete engineered fill for a variety of civil and geotechnical applications, including back fills on foundations and retaining walls, soil remediation, void fills, annular pipe fills and slab, and foundation fills.

AIA Contract Documents are a library of over 140 contracts, administrative forms, guides, and exhibits recognized as the benchmark documents for managing transactions and relationships in design and construction projects, and project management and contract administration. The AIA has published Contract Documents for the design and construction industries since 1888. Today, the AIA Contract Documents® are the industry’s most widely accepted standard contract documents and the most fair and balanced to all parties. The documents are drafted and revised by the AIA Contract Documents® Committee with the assistance of legal and insurance counsel and AIA staff. It is important that the current version of each document be used. Consultation with an attorney is recommended with respect to the use and modification of the documents because the legal risks and requirements at issue in design and construction contracts are significant and vary from state to state.

Development of Documents
The AIA Documents Committee is composed of a wide range of thought leaders from across the industry including architects, contractors, lawyers, insurers and others. AIA Contract Documents® are generally accepted by the construction industry as being fair to all parties and they are used as the basis for many project agreements.

Drafting and revising the documents is a collaborative effort involving the AIA Documents Committee and other external entities and individuals, including: Institute staff, outside legal counsel, and representatives of insurance companies and other construction industry associations and leaders. In addition to legal liability, the revision process is driven by feedback from those who use the documents in their daily practices as well as the evolution of the design and construction industry.

AIA Contract Documents® are written to provide a common basis for establishing legal and business relationships in the construction process. Because the documents are revised periodically, they reflect industry practice as well as recent court decisions.

Changes and developments in the building industry sometimes necessitate drafting new contract documents and revising existing ones. When doing so, the AIA abides by certain Drafting Principles and follows a Revision Policy to ensure that AIA Contract Documents® maintain consistently high standards while still adapting to current trends and practices.

Organization of Documents
AIA Contract Documents® are classified into “series” and “families.” Series divide the documents by type (owner-architect, owner-contractor, architect-consultant, etc.). Families are composed of documents from each series that support a particular method of project delivery (e.g., design-build or construction management). Understanding the document families is necessary to ensure that users select the proper documents and maintain coordination among them.
